SERVICES

Enter terms to search services   Filter by category

Virtual Command Center
The Virtual Command Center (VCC) is a secure common operating platform providing seamless, real-time, situational awareness and critical information management.

FBI Laboratory Contributor Portal
The FBI Laboratory Contributor Portal allows non-FBI law enforcement contributors to submit a Request for Laboratory Examination, check status of casework, and retrieve released Laboratory Reports. Examination requests in FBI investigations must be routed through an FBI Field Office rather than the Contributor Portal. Due to technical limitations, users with RISSNET as their identity provider cannot currently submit requests through the Contributor Portal

NDCAC
The NDCAC is an assistance center designed to focus on Law Enforcement's challenges with communications services, training, and coordination needs. This system is a portal for NDCAC clients to access training opportunities, information regarding communications services, tools, and Points-Of-Contact information. Users must be vetted law enforcement personnel. Users, who are not NDCAC clients, will be directed to a client registration page.

FACE Services
The Facial Analysis, Comparison, and Evaluation (FACE) Services Unit at the Criminal Justice Information Services (CJIS) Division provides support in the form of investigative leads for the FBI. Using face recognition (FR) software, Biometric Images Specialists (BISs) compare submitted photographs of subjects who are the focus of Type 1 & 2, and Type 5 assessments (as well as those under active FBI investigations) with face photos housed in selected internal and external databases.

Cyber Investigation Certification Program
The Cyber Investigation Certification Program (CICP) is a multi-level curriculum available to all LEEP users designed to teach law enforcement personnel the technical skills they need to conduct cyber investigations.

Active Shooter
The FBI Active Shooter Resources Page serves as a single clearinghouse for all materials available for use by law enforcement agencies and other first responders around the country.

Consular Consolidated Database
The CCD database holds all of the current and archived data from all of the Consular

⊘ VCC Activation Reminder

With the increased functionality to the Virtual Command Center (VCC), the FBI CJIS Online Services and Operations Unit (OSOU) would like to remind all VCC Administrators to review their VCCs upon activation for the following:

- **VCC Membership:** Upon each VCC activation, it is recommended that the VCC Administrator review the membership and add or remove users based on the agency need. If any assistance is needed, please contact membership@leo.gov at any time.

- **VCC Folders:** Previously added folders, images, documents, etc., may not be needed in the current VCC activation. It is recommended that the VCC Administrator review, manage, and make changes to folders and content from previous operations that may not be pertinent to the new operation.

- **Fields:** Previously used **Categories, Locations, Assigned, Warrants, Status and Miscellaneous** may no longer be relevant for the current VCC activation. It is recommended that the VCC Administrator review each of these fields and delete any that are no longer necessary.

Questions? Please contact vccleosupport@leo.gov or the FBI Support Center at 888-334-4536

Threats to MOCA ⚑
05/20/19 12:15 PM
Threat: Email | Threat: Handwritten

Medium: The MOCA Director has received e-mail several threats in the last week to stop showing "disgusting modern so-called art" or face the consequences. The threats were from KJU@facebook.com and contained an attachment. A suspect handed a note to a guard which contained the same threat. JPD has obtained a photo of the suspect from a security camera.

FBI Support Center 1.888.334.4536

Introduction to the FBI's LEEP and Information Sharing
IACP Technology Conference
20 May 2019

I. What is **LEEP**?
    a. Law Enforcement Online – 1 website-now superseded by LEEP
    b. Law Enforcement Enterprise Portal (LEEP) – gateway to resources for
        i.   Law Enforcement
        ii. Intelligence Community (IC)
        iii. Criminal Justice partners
II. Does this duplicate the services of other agencies?
    a. No, due to the Intelligence Reform and Terrorism Prevention Act of 2004
    b. Program Manager, Information Sharing Environment (PM-ISE)
III. What services are on LEEP? (Not all services are seen by all users!)
    a. **Active Shooter Resources Page** – single clearinghouse for materials available for use by law enforcement agencies and other first responders around the country.
    b. **Cyber Shield Alliance** – multi-agency FBI-led effort to proactively defend and counter cyber threats against LE networks and critical technologies.
    c. **Cyber Investigation Certification Program** – first cyber investigative course; developed by Carnegie-Mellon University and FBI-Cyber Division.
    d. **eGuardian** – (U) Unclassified part of system that permits partners to report, track, and share threats, events, and suspicious activities with a nexus to terrorism, Cyber, or other criminal activity.
    e. **Enterprise File Transfer Service (EFTS)** – provides all LEEP users with a web interface to securely share and transmit files (files greater than 2 GB; transfer multiple files; compress/unwrap files on the fly).
    f. **FACE Services** – The Facial Analysis, Comparison, and Evaluation Services Unit (FACE) at the Criminal Justice Information Services (CJIS) Division provides support in the form of investigative leads for the FBI. Using face recognition (FR) software, Biometric Image Specialists (BISs) compare submitted photographs of subjects who are the focus of Type 1 & 2, Type 5 assessments (as well as those under FBI investigations) with face photos housed in selected internal and external databases.
    g. **FBI Laboratory Contributor Panel** – The FBI LCP supports online, unclassified Requests for Laboratory Examination by the FBI Laboratory. Cases that are being managed by the FBI should be submitted to the lab by the associated field office rather than by the portal.

h. **FBI Uplift Service** – The Uplift service allows all FBI users to transfer files to FBINet.

i. **FBI Virtual Academy** – enterprise training system which provides access to all FBI training that is available to the FBI's criminal justice and intelligence partners.

j. **Hostage Barricade Database System (HOBAS)** - is intended to be used as a post-incident data collection tool with the capability of providing empirical statistical data of the inputted incidents. The concept of the application is to give law enforcement personnel the capability of a centralized location for reporting hostage and barricade incidents. (It is accessed via the Law Enforcement Negotiations Support (LENS) SIG).

k. **IC^3** – Internet Crime Complaint Center – a means of reporting, developing, and referring criminal complaints regarding cyber-crime.

l. **Innocence Lost Database/Web-Archival Tool** – is a system that allows Innocence Lost National Initiative LE members and partners to centralize LES victim, pimp, and associate intelligence connected with child sex trafficking and further analyze actionable leads with available LES records and NCMEC intelligence. Access to this system requires direct association with and subsequent approvals from Violent Crimes Against Children (VCAC) or Child Exploitation Task Force (CETF) locations.

m. **Intelink** – (U) Unclassified NSA system - secure portal for integrated intelligence dissemination and collaborative efforts.

n. **Intelink IM** – internet tool that allows real-time chat between users logged into the system.

o. **Joint Automated Booking System (JABS)** –repository of federal arrest information.

p. **Justice Connect** – Justice Connect is a user-driven, real-time tool that allows users across agencies to communicate, collaborate, and interact with each other through various applications such as communities of interest, wikis, blogs, forums, and activities.

q. **Justice Enterprise File-Sharing (JEFS)** – has been created using box.com as the base technology and provides cloud hosted capabilities for greater stability and growth for file/folder sharing. It has the ability to transfer files up to 15 GB.

r. **LEO.gov email** – (U) Unclassified government email service.

s. **LEOKA** – Law Enforcement Officers Killed and Assaulted – data, research, and instructional services relative to law enforcement safety.

t. **Malware Investigator** – automated system that analyzes suspected malware samples and quickly returns technical information about the samples to its users.

u. **National Missing and Unidentified Person System (NamUs)** - is a powerful, free tool to assist law enforcement officers, medical examiners, coroners, allied criminal justice professionals, and the family members of missing persons in resolving the 13,000 to 40,000 recovered decedents each year in the U.S. NamUs resources include a team of expert Regional System Administrators (RSAs) who assist users with case management and biometric support services. The online databases contain detailed case information that allows for searching using a wide variety of identifiers, such as physical features, dental records and tattoos, while protecting sensitive case data which is restricted and only viewable by medical examiners, coroners, law enforcement, clearinghouse personnel, and other allied forensic specialists. (NamUs is accessed via the SIG page).

v. **National Center for Missing and Exploited Children (NCMEC)** - is a non–profit 501(c)(3) corporation whose mission is to help find missing children, reduce child sexual exploitation, and prevent child victimization. Since 1984, NCMEC has served as the national clearinghouse and resource center for families, victims, private organizations, law enforcement and the public on issues relating to missing and sexually exploited children. (It is accessed via the NCMEC SIG).

w. **National Domestic Communications Assistance Center (NDCAC)** – serves as a center for electronic surveillance knowledge management and facilitates the sharing of technical solutions and know-how among law enforcement agencies.

x. **National Data Exchange (N-DEx)** – provides local, state, tribal, and federal criminal justice agencies with a mechanism to nationally share, search, link, and analyze information across jurisdictional boundaries.

y. **National Gang Intelligence Center (NGIC)** – multi-agency effort that integrates gang information from local, state, and federal law enforcement entities to serve as a centralized intelligence resource for gang information and analytical support.

z. **National Use-of-Force Data Collection** – The National Use-of-Force Data Collection is a statistical collection concerning law enforcement us of force that results in one of the following circumstances: the death of a person; the serious bodily injury of a person; or when a law enforcement officers discharges a firearm at or in the direction of a person. Enrolled users or users seeking access, can click on the National Use-of-Force Data Collection logo to access the web application.

aa. **NICS LE e-Check (National Instant Criminal Background Check System Electronic Check)** – can be used by law enforcement/criminal justice agencies conducting firearm background checks for authorized purposes.

a. **Operational Response and Investigative Online Network (ORION)** - is a crisis information management system. ORION provides case management and related information processing capabilities to support Federal, State, Local, and Tribal law enforcement personnel in a coordinated response to crises at special events or critical incidents; it enables users to capture, search, and analyze information provided in numerous phone tips, emails, and interviews. (It is accessible via the Crisis Management Coordinator at your local FBI office).

b. **PIX (Protective Intelligence eXchange)** – is a U.S. Secret Service database of subjects who have an adverse or unusual interest in local, state, and federal public officials.

c. **RISC (Repository for Individuals of Special Concern)** – mobile fingerprint ID to search selected CJIS files for: (1) wanted persons; (2) national sex offender registry persons; (3) known or suspected terrorists, and (4) other persons of special interest. The service is free but agencies must procure the mobile device.

d. **RISSNet (Regional Information Sharing System Network)** – BJA system that provides timely access to a variety of law enforcement sensitive, officer safety, and public safety resources.

e. **(LEO) Special Interest Group (SIG)** – a controlled/structured access area for specialized organizations of disciplines to share and store information as a means to enhance collaboration with law enforcement, intelligence, and emergency management communities.

f. **Symbol Affiliation Library (SAL)** -

g. **Scrap Theft Alert** – STA allows law enforcement and victims of metal theft to post alerts that are sent to registered users within a 100-mile default radius of the theft location. The alert radius can be expanded when warranted.

h. **Teleporter** – a system that allows operational-related files to be shared and moved between law enforcement and partner communities including: local, state, tribal, foreign LE, OGA, and private sector partners. Max file size: 5 GB.

i. **TXMAP** – is a web mapping and reporting application for the purpose of facilitating the visual representation and spatial analysis of incident data that includes criminal offenses and investigations, emergency management information, infrastructure data and asset data.

j. **VALOR** – a Dept. Of Justice Officer Safety and Wellness Program that provides critical, no-cost on-site training, eLearning, resources and technical assistance with the goal of changing officers' behavior to increase their safety and wellness.

k. **ViCAP (Violent Criminal Apprehension Program)** – a repository for behavioral and investigative information related to criteria homicides, sexual assaults, missing persons, and unidentified human remains cases.

I. **(LEO) Virtual Command Center (VCC)** – a real-time, collaborative tool that facilitates shared informational awareness and event management. It is typically used for operations/events such as: Active Shooter cases; Warrant services; Special Events; Natural Disasters; Child Abductions; Terrorist Attacks and Threats, and many other matters.

IV. What partnered sites are on LEEP, and, as far as that goes, what are partnered sites?

    a. Partnered sites are services that are linked to LEEP but outside its secure environment; such services often require a separate user name and password for access.

    b. LEEP's partnered sites include:

        i. FBI Wanted Bank Robbers – a gallery of unknown bank robbery suspects wanted by the Bureau; access surveillance photos, physical description data, robbery details and more.

        ii. CrimeDex network – an on-line searchable data based used by 10,500 members concerned with fraud, ATM skimming, organized retail theft, and other crimes.

        iii. Better Business Bureau (BBB) Scam Tracker – a repository of reports of fraudulent and illegal activity provided to the BBB by the public throughout the U.S. and Canada.

        iv. Law Enforcement Cyber Center (LECC) – to help SLTT law enforcement better understand and address cyber and cybercrime issues, as well as help law enforcement protect its own IT systems.

        v. National Insurance Crime Bureau (NICB) ISO ClaimSearch – includes property and casualty claims data, along with vehicle-related information provided by NICB.

        vi. Technical Resources for Incident Prevention (TRIPwire) – provides 24/7 online, collaborative information and is a resource-sharing portal for bomb technicians, first responders, and military personnel.

        vii. ATF eTrace – is an internet-based application that allows participating LE agencies to submit firearm trace requests to the ATF National Tracing Center.

        viii. Case Explorer.net (CE) – CE was designed and developed by the Washington/Baltimore HIDTA; it provides target and event deconflction services.

        ix. Washington State Critical Incident Mapping Program – provide information to first responders, including tactical pre-plans, satellite and geospatial imagery, interior and exterior photos, floor plans, staging areas, hazardous materials, utility shut-offs, and evacuation routes.

    x.   Transaction Records Analysis Center (TRAC) – is a portal that provides a suite of software tools that assist law enforcement in analyzing Money Service Business (MSB) transaction data obtained via subpoena.

    xi.   Federal Bureau of Prisons Inmate Locator – contains information about federal inmates as well as anyone who was in BOP custody.

V.   How do I get access to LEEP?

    a.   Complete an on-line application per person at https://www.cjis.gov, or …

    b.   Have an agency SAML into LEEP for a whole department

VI.   Local FBI Point-of-Contact

    a.   FBI-Jacksonville, 6061 Gate Parkway, Jacksonville, FL 32256, (O) 904.248.7000
